

SWAROVSKI CRYSTAL PALACE

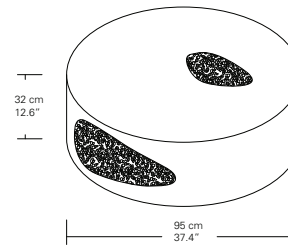

Cavern 2008

Fredrikson Stallard

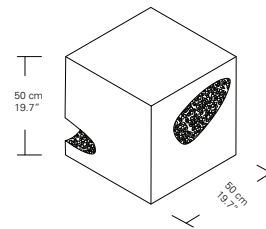

Transcending convention, Fredrikson Stallard has created a collection of solid monolithic furniture forms in three different materials – concrete, wood and leather. Perforated by cavernous openings, the interior surfaces are encrusted with thousands of Swarovski crystals and lit from within to add volume and density to the sculptures.

	Weight	Material	Model Number
Round Table	40kg / 88.2lbs	Ebonised Wood	/

Square Table	53kg / 116.8lbs	Concrete	/
	15kg / 33.1lbs	Ebonised Wood	/
